IN THE SPECIFICATION:

Amend the specification by inserting before the first line the sentence:

The specification is changed as follows:

Page 1, Paragraph 2:

In general, a plasma display panel (abbreviated to "PDP" below) has a flat structure and a high display contrast without flickering. Moreover, it has many characteristics: for example, it can be made into a relatively big screen, it has a fast response, and, being of the self-fluorescent type, it can be made to fluoresce in multi-color by the use of phosphors. For this reason, its application has been expanding in the fields of large size public display device and color television, etc., in recent years.
